DATASHEET

CAT GEN7 TOURNIQUET

The CAT GEN7 has been re-designed, making it the most effective Combat Application Tourniquet® to date. The new CAT GEN7 is simpler to use thanks to a single application protocol, single buckle routing system and further improvements to its components and construction. The Single Routing Buckle is a direct response to in-depth reviews of field and testing reports. Featuring a new single-routing buckle system, the GEN7 allows for simpler and faster application with more efficient slack removal resulting in decreased blood loss with fewer windlass turns.

1. SINGLE ROUTING BUCKLE

Decreased blood loss, effective slack removal, fewer windlass turns, simplified training with single protocol application standards

4. WINDLASS STRAP

New reinforced strap, grey colour for tactical considerations (Black only)

5. STABILIZATION PLATE

Reinforced, bevelled contact bar, improved comfort

2. WINDLASS ROD

Increased diameter, enhanced strength, aggressive ribbing improves grip

6. FREE-MOVING INTERNAL BAND

Patented band within band, truly even distribution of circumferential pressure

3. WINDLASS CLIP

Bilateral bevelled entry, rapid windlass lock, bilateral buttress, added strength BUCKLESINGLE
