DATASHEET

DOUBLE DOOR METAL FIRST AID CABINET

Double Door, Single Depth Cabinet provides safe and secure storage for high volume first aid contents. The First Aid Cabinet is recommended for high-risk working places with a large number of people. The first aid cabinet is lockable and comes with two keys in order to maintain the contents safe. Inside the first aid cabinet there are shelves to organise the items and to ease the finding of what you need in case of an emergency. The first aid cabinet includes an internal lockable storage where refills can be kept to ensure you are always protected. Double Door, Single Depth Cabinet is made of metal and has a hardwearing epoxy finish. A white cross and "First Aid " marking help identify the first aid point in case of a casualty. The First Aid Cabinet is recommended to be mounted on the wall and is not designed to be transported to a casualty. Inside the first aid cabinet a first aid grab back can be stored according to your organisation's needs. Cabinet supplied empty
