

HEARTSINE ADULT PAD PAK

Product Code

CM1260

Available in Sizes

195X130X35MM

Available in Colours

Grey
CM1260

HeartSine PAD-Pak combined battery & electrodes
Suitable for adults and children >8 years or > 25kg, 4 yr shelf life from DoM

The Pad-Pak system is unique to HeartSine and saves you in many ways. Firstly it contains both battery and pads in one simple to replace cartridge meaning there is only ever one expiry date and only ever one component to replace. Rather than having a large and heavy battery HeartSine have come up with the single-event pad-pak concept that is lightweight and easy to change. After an event you have to replace the pads on any defibrillator – so its no harder to replace a pad-pak. And this means less weight, less cost, less confusing overlapping expiring components. If you have a genuine event where you use your AED in a rescue HeartSine will give you a replacement pad-pak free of charge (subject to some simple terms and conditions).

Technical information:

Weight: 0.2kg (0.44lb)

Battery Type: Disposable single-use combined battery and defibrillation electrode cartridge. Lithium manganese dioxide.

Battery capacity new: >60 shocks at 200J or 6 hours of battery use

Battery capacity at 4 years: >10 shocks at 200J

Electrode type: Single-use pre-attached combined ECG sensor/defibrillation pad

Electrode cable length: 1m (3.3 feet)

The Pad-Pak-03 is for use on victims of Sudden Cardiac Arrest from 8 years of age (or 25kg) upwards.
