

## CYALUME 12HR 15CM SNAPLIGHT GREEN LIGHT STICK BOX OF 10

Product Code

CM1755

- The Cyalume Snap Light is an industrial grade chemical light stick providing instant 360 degree illumination, that can be seen up to a mile away in optimal conditions.
- The Snap Light is waterproof, buoyant, non-toxic, and non-flammable.
- To activate the light stick, bend, snap and shake the tube.
- The light stick has a hook and hole top, for hanging or attaching the light. Each light stick is individually foil-wrapped for protection from light and moisture, and has up to a five-year shelf life from date of manufacture.
- Durable, waterproof, external body of the light stick is made from low density polyethylene (LDPE), and is phthalate free for safety.
- Illuminating chemical substance is non-toxic and non-flammable.
- Light sticks are chemiluminescent substances in plastic tubes that provide hours of illumination in a number of safety, industrial, and military applications.
- Cyalume light sticks do not produce heat and are non-sparking, which makes them useful in hazardous situations where sparks or flame could cause an explosion.
- Cyalume provides dependable light for use in emergencies such as blackouts, industrial accidents and natural disasters.
