630111-00EU V-Tec Mini Personal Fall limiter 1.8M Aluminium Scaffold hook Twin Leg Description
The V-TEC 1.8M Mini retractable lanyard is the most compact & lightweight self-retracting lanyard ever developed using multiple spring radial energy-absorbing technology. This new design eliminates the need for an external energy-absorber outside of the housing making it the smallest personal fall limiter on the market.

The V-TEC Twin Mini uses a TwinLink to connect two Mini PFLs. This lightweight attachment allows the configuration to provide all the features of a Mini PFL, with greater mobility and continuous attachment, whilst working on complex structures.

- Integral energy absorber
- Requires zero recalibration or adjustment
- The energy absorber is completely sealed from external contaminants
- A fully rotating attachment point for complete flexibility –both 360° and 180° providing a free range of motion
- Structurally reinforced pawl mechanism through precision engineering
- highly durable polycarbonate case houses the SRL, and its transparency allows for easy visual inspection of critical internal components
- High quality components manufactured from high-grade stainless steel and engineered plastics
- Twin Leg
- Aluminium rebar lightweight hook anchorage point
- TwinLink connector harness connection
- 60-140KG including tool weight limit
- EN360:2002 Personal protective equipment against falls from a height. Retractable type fall arresters
