Universal Fit, Function & Efficiency in One Great Tool!

This revolutionary cutter is equipped with a long-lasting, rugged, cast metal safety blade / guard system, designed specifically for continuous or occasional (top) carton cutting and enhanced with additional safety features throughout. The safety blade / guard activation system safely extends the blade & guard in tandem, protecting against exposed razor blade cuts, while cutting. Additionally since the blade / guard extends for cutting only, the spring-back action eliminates the risk of cutter injuries, which in the end increases profits and eliminates medical insurance claims. Designed as a universal right and left handed cutter, it can be switched from right to left hand, as easily as a blade change. Increase profitability using a single, 3-in-1 tool, that is equipped to handle the most demanding stocking, and warehouse tasks efficiently.

The S7 Safety Cutter combines the utility of an industrial knife with the safety benefits of a self-retracting safety cutter

To maximize productivity this 3-in-1 tool incorporates an easy release film cutter, heavy duty tape splitter and versatile safety box cutter

The guard covers the blade during top cutting to protect the user and the unique angle of the blade is set specifically to avoid damaging the contents within the box

The spring-back blade can also be extended without the guard when needed and has three locking blade depth positions; top cut, shallow tray cut and deep cut

The integrated film cutter is perfect for safely cutting shrink-wrap, plastic straps, twine and more Users also find that utilizing the heavy duty tape splitter while opening boxes further prevents injuries and extends the life of the blades

Features:

- Spring back self-retracting safety blade
- Guard protection mechanism
- Right or left handed, ergonomically designed handle
- Blade and guard move in tandem and cannot be over-riden
- Integrated film cutter for improved productivity and efficiency
- Easy blade change reduces costly razor blade injuries and makes box cutting safe, easy and comfortable

Count safety tip puncture wounds
